CORPORATE SOURCE INDEX

AGARD INDEX OF PUBLICATIONS (1974 - 1976)

TYPICAL CORPORATE SOURCE INDEX LISTING

Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indigate the type of document cited (i.e., translation). The page number identifies the page in the abstract section (Part 1) on which the citation appears. The NASA accession number denotes the number by which the citation is identified on that page. The titles are arranged under each corporate source in ascending accession number order.

REPORT/ACCESSION NUMBER INDEX

AGARD INDEX OF PUBLICATIONS (1974 - 1976)

TYPICAL REPORT/ACCESSION NUMBER INDEX LISTING

Listings in this index are arranged alphanumerically by AGARD report number. The page number identifies the page in the abstract section (Part 1) on which the citation appears. The NASA accession number denotes the number by which the citation is identified on that page. A pound (#) sign indicates that the item is available on microfiche. A plus sign (+) indicates that document was not microfiched but that a one-to-one facsimite copy may be available. Microfiche or hard copy are available from the purchase agencies listed on the back cover.
